vs code

Experience

Teaching Assistant, seasonally 2019- Present

Girls Who Code | Summer Immersion Program

- // Work with teaching team to evalute and improve the learning experience for students
- // Support Instructor in maintaining an inclusive, engaging, and interactive virtual classroom
- // Troubleshoot students' questions, resolve coding issues, and help debug front end code
- // Conduct lessons in HTML, CSS, and JavaScript through Zoom

Assistant Manager, Aug 2020 - Present

Code Ninjas

- // Listen to the wants and need that parents have for their children through our programs.
- // Provide feedback to my manager about current programs, activities, and event issues
- // Facilitate a positive growth environment that encourages overcoming challenges

Web Developer, Spring 2021

The Short horn Student Publication (UTA)

- // Maintain website by keeping data up to date and modern coding standards
- // Collaborate with journalist to provide the best digital news experience
- // Built website components using TownNews CMS, HTML, and CSS
- // Collect and display various data analysis to ehance the logos of a topic or story

Projects

ClientSide, UX Designer, Front End Developer

Helps service providers connect with their clients to provide more cohesive experience

- // Conducted interviews to find user pain points and various user groups for the product
- // Created empathy maps, user personas, and journeys to deepen understanding of user groups.
- // Brainstormed solutions using storyboards and low-fi wireframes
- // Conducting testing with low-fi wireframes to find best solution for most user groups
- // Will soon develop high-fi wireframes and conduct more testing

The Popcorn Store, UX Designer, Web Developer | Group Project

Redesigned a website for local buisness to increase online sales and presence

- // Developed a Creative Brief to gather information about the business, the user, and their goals
- // Developed sitemap to improve the flow of the website and add missing information.
- // Created components for the project using UX law's such as, Miller's Law, Fitt's Law, etc.
- // Developed low-fi and high-fi wireframes
- // Developed website using HTML, CSS, and Grid
